

# Tomahawk™ FrameFix™

7.5 x 100mm Zinc

### Fast Efficient Fixing:

The FrameFix washer head masonry screw is ideal for timber fixing to concrete. Constructive Brands FrameFix is part of the Constructive Brands concrete and masonry screw family, available in zinc with a Torx 40 drive flange head.

### Applications:

- For fixing timber to concrete or brick/ blockwork
- Domed washered head for high clamping force
- Non-expansion for close to concrete edge
- Can also be used for timber to timber applications
- Fully removable design (nothing left in the concrete)
- Great for bottom plate timber to concrete fixing
- No licence required - unlike with shot fired pin and charge

Performance derived in accordance with AS 1720.1 – 2010 (Timber Structures).

### Product Performance:

Constructive Brands FrameFix is designed and manufactured based on pull-through capacity of washer head in F5 timber with reference to:

- AS1720 1-2010 Australian standard for timber structures design (Maximum working load = **2.28kN**).
- EN1995 - 1-1:2005 Eurocode 5 design to timber structures part 1-1 (Maximum working load = **2.81kN**)

Item Code	Description	Drill Diam.	Timber Thickness	Driver Type	Pack Qty
